

# Uputstvo za eksportovanje projekata (Eclipse)

Projekte za laboratorijske vežbe obavezno eksportovati prema ovom uputstvu.

Nepravilno eksportovani projekti neće biti uzeti u razmatranje.

Ovo uključuje i nepravilno imenovane projekte.

## Konvencija za imenovanje projekata:

brojIndeksa Ime Prezime **PJ Lab** brojVežbe (string "PJ Lab" stoji isto kod svakog projekta)

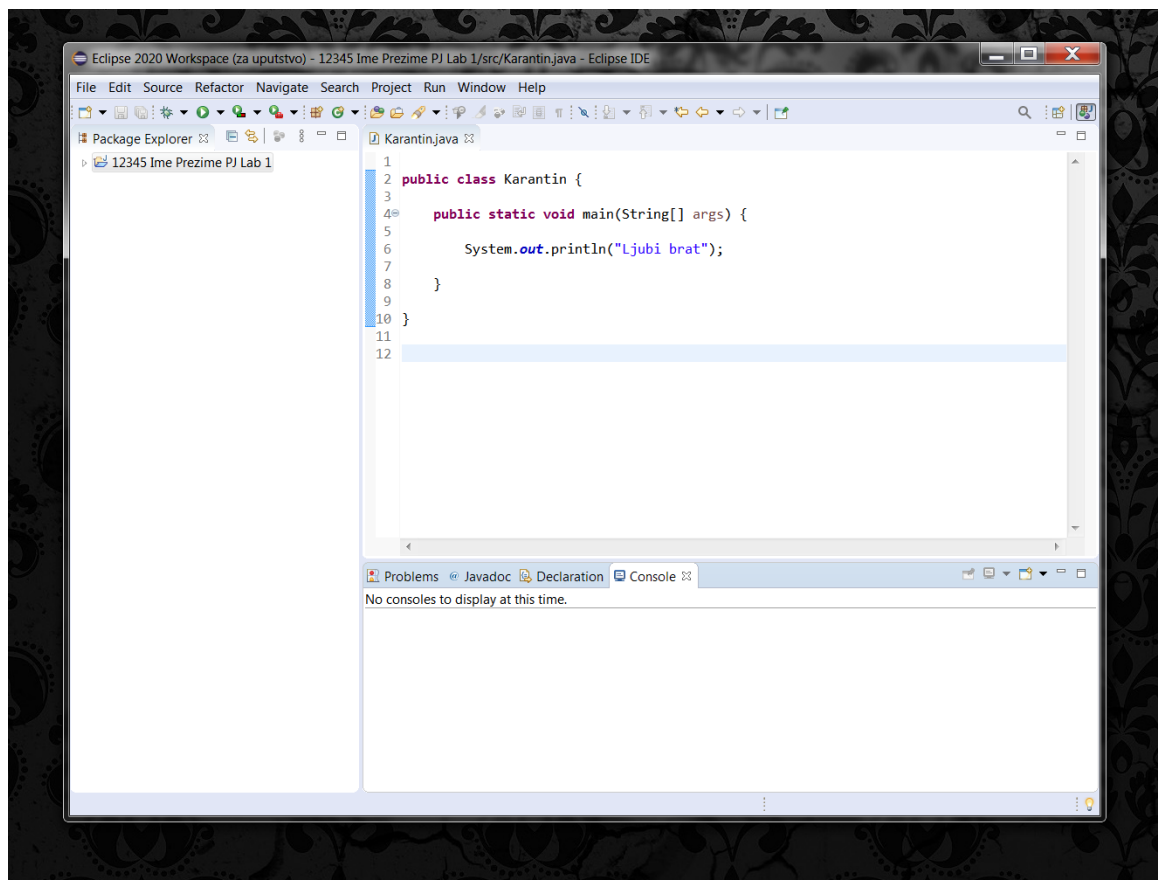

Primer za pravilno imenovan projekat za drugu lab vežbu:

**16611 Stefan Ilic PJ Lab 2**

Nazive projekata pisati latinicom. Ne koristiti srpska slova (šđčćž) u nazivima projekata.

## Postupak eksportovanja projekata:

Projekat se vidi levo u Package Exploreru.

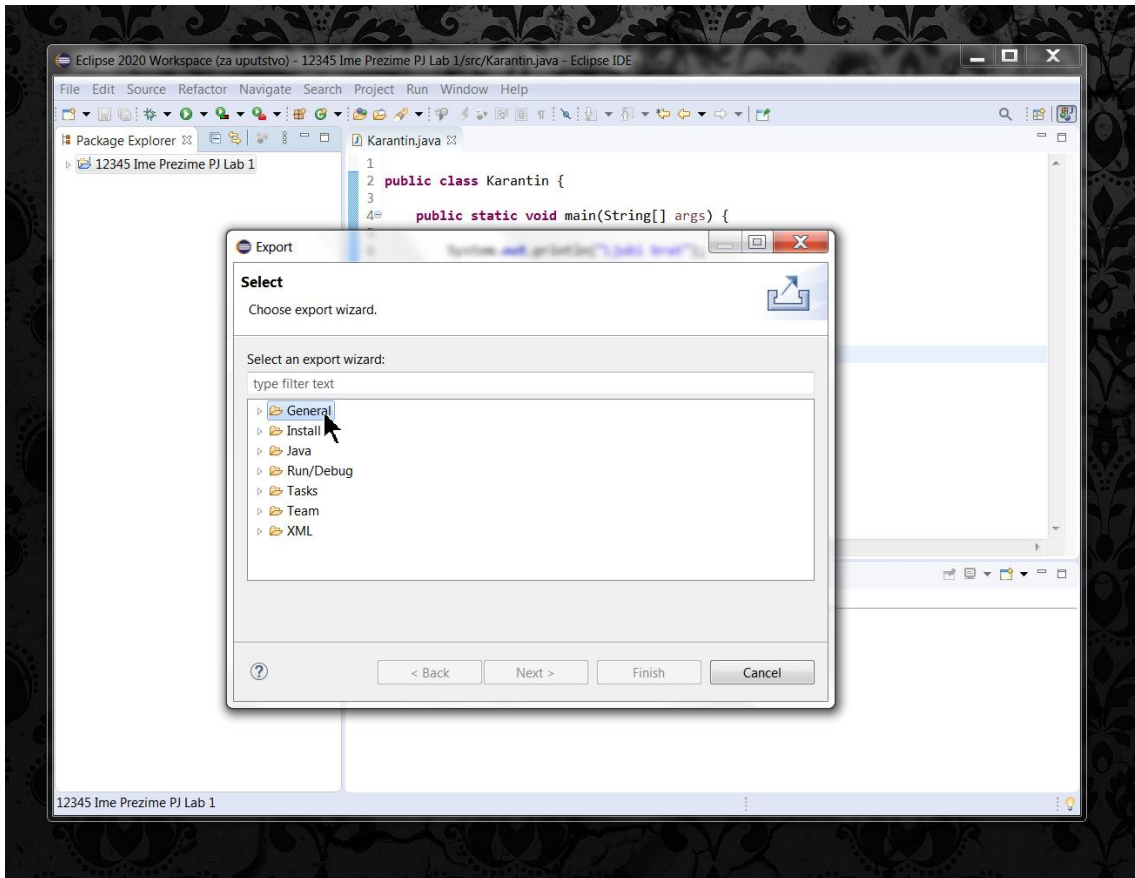

The screenshot displays the Eclipse IDE environment. The title bar indicates the workspace is '12345 Ime Prezime PJ Lab 1/src/Karantin.java - Eclipse IDE'. The main menu bar includes File, Edit, Source, Refactor, Navigate, Search, Project, Run, Window, and Help. The Package Explorer on the left shows a project named '12345 Ime Prezime PJ Lab 1'. A right-click context menu is open over this project, listing various actions with their respective keyboard shortcuts. The editor area on the right shows the 'Karantin.java' file with a simple Java program. The bottom status bar shows the project name '12345 Ime Prezime PJ Lab 1'.

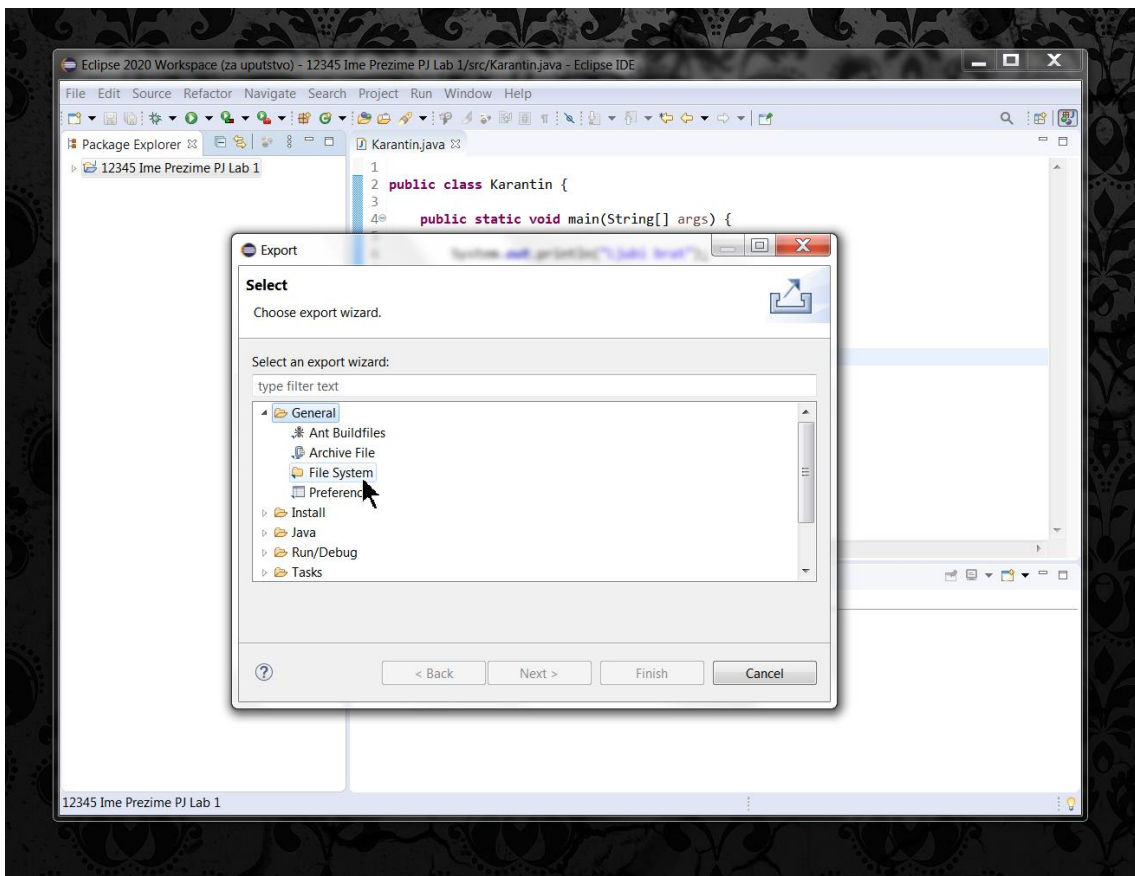

Action	Keyboard Shortcut
New	
Go Into	
Open in New Window	
Open Type Hierarchy	F4
Show In	Alt+Shift+W
Copy	Ctrl+C
Copy Qualified Name	
Paste	Ctrl+V
Delete	Delete
Remove from Context	Ctrl+Alt+Shift+Down
Build Path	
Source	Alt+Shift+S
Refactor	Alt+Shift+T
Import...

Refresh	F5
Close Project	
Assign Working Sets...	
Coverage As	
Run As	
Debug As	
Restore from Local History...	
Team	
Compare With	
Configure	
Validate	
Properties	Alt+Enter

The screenshot shows the Eclipse IDE with the 'File' menu open. The 'Export' option is highlighted, and a submenu is visible with the 'Export' option selected. The background code in the editor shows a Java class named 'Karantin.java' with a 'main' method. The Package Explorer on the left shows the project structure.

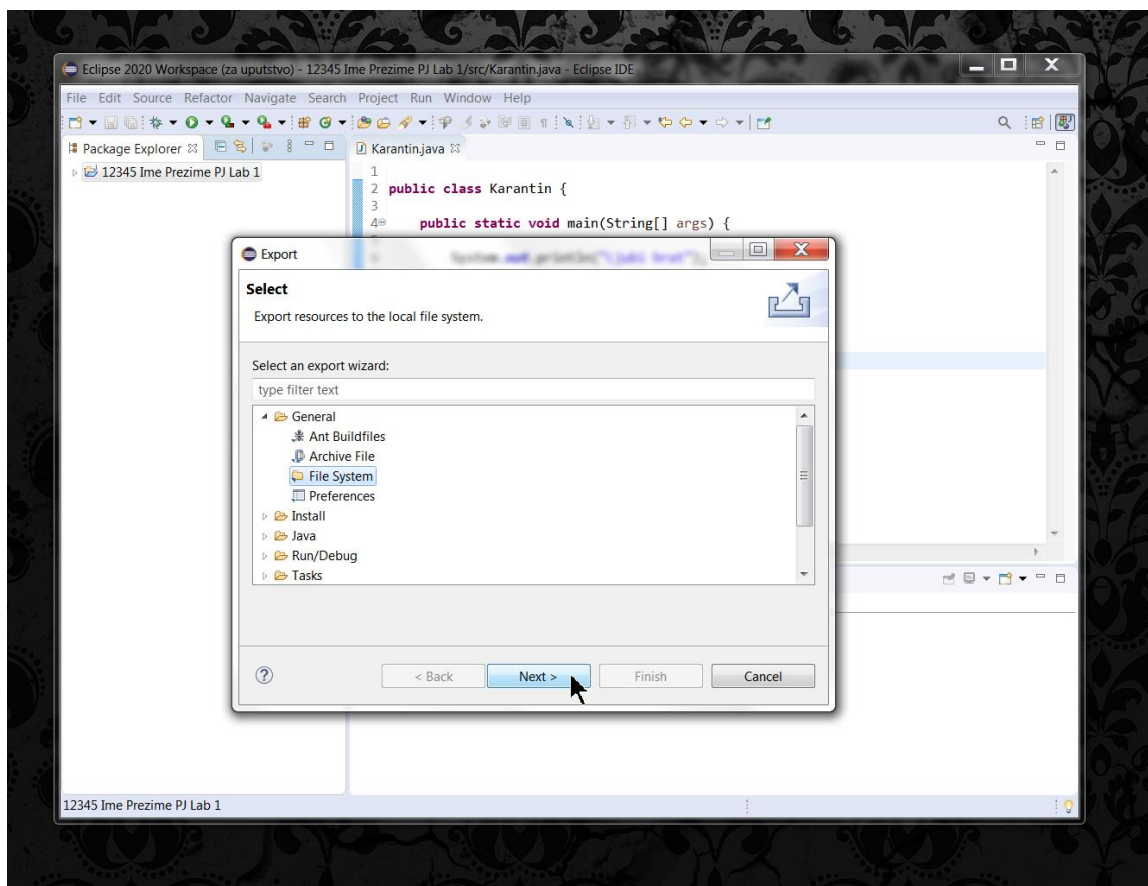

U Export dijalogu izbrati General:

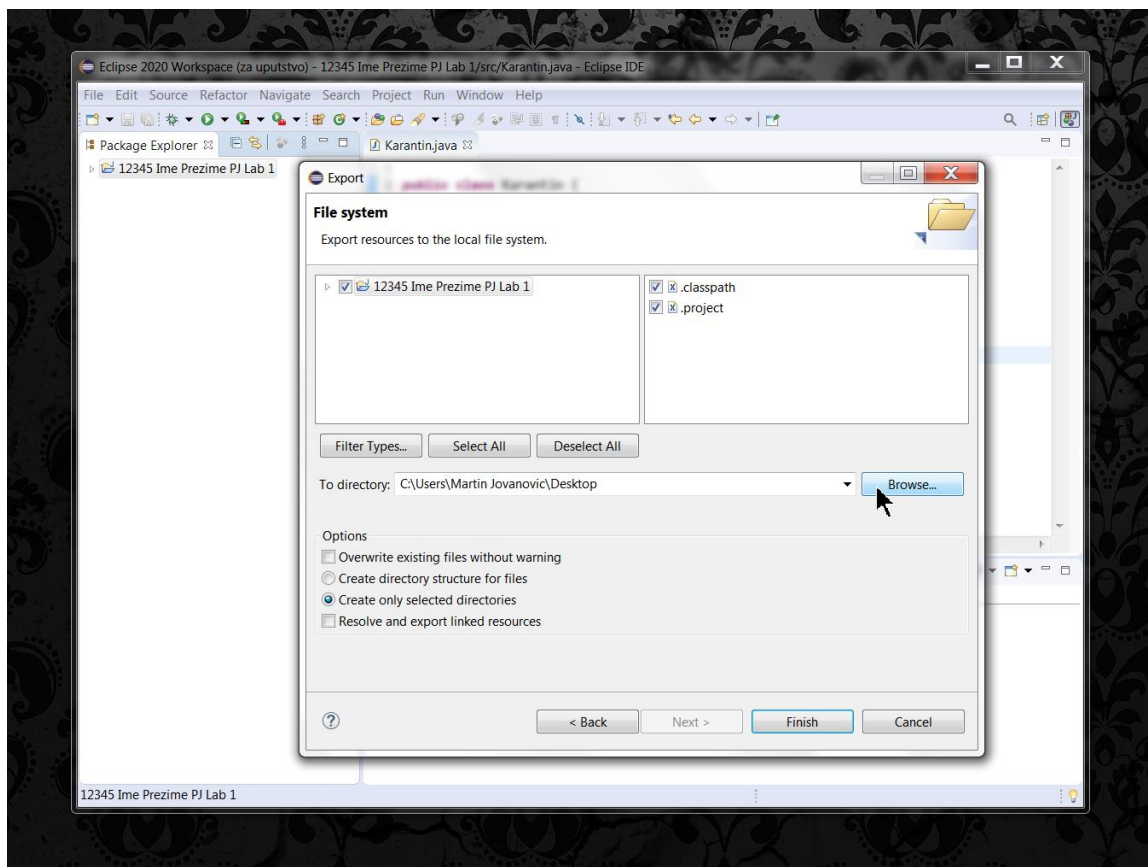

U okviru General izabrati File System:

Next:

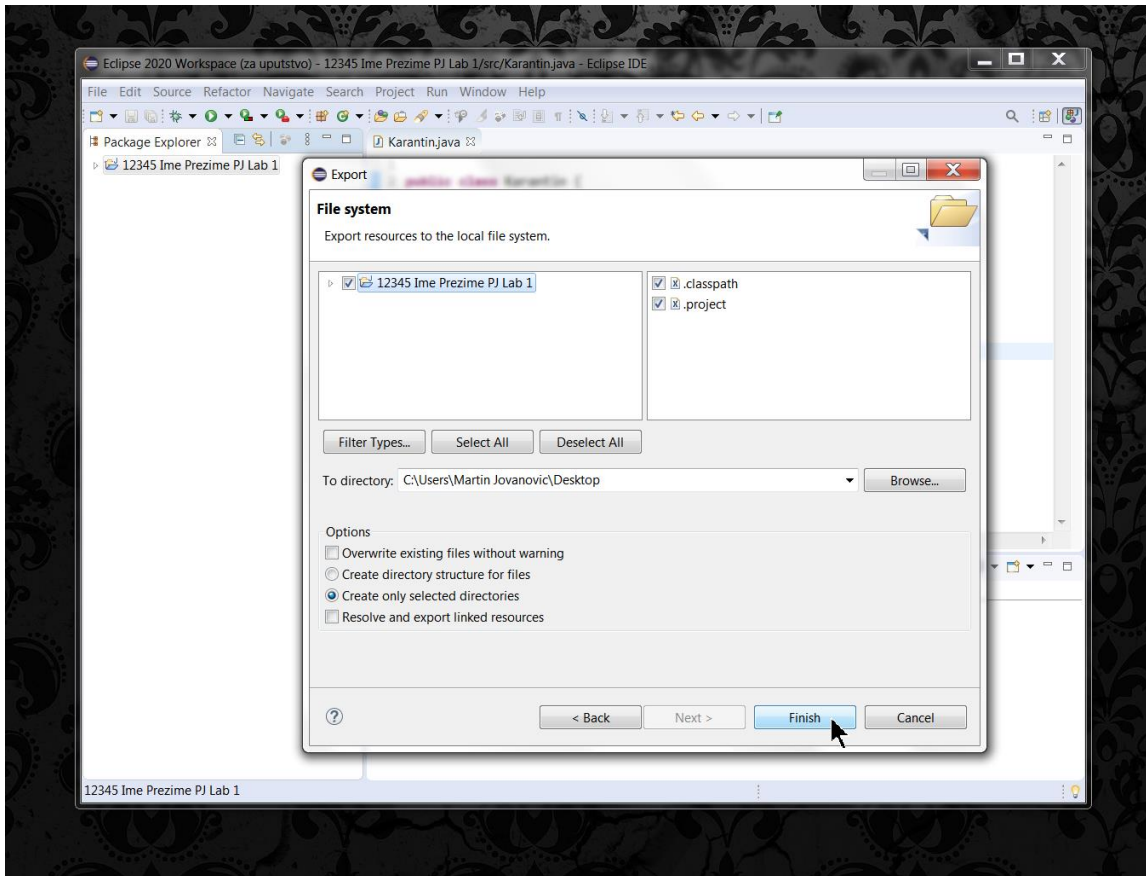

U drugom Export dijalogu izabrati direktorijum gde će projekat eksportovati (npr. Desktop):

Voditi računa da sve vezano za projekat bude selektovano.

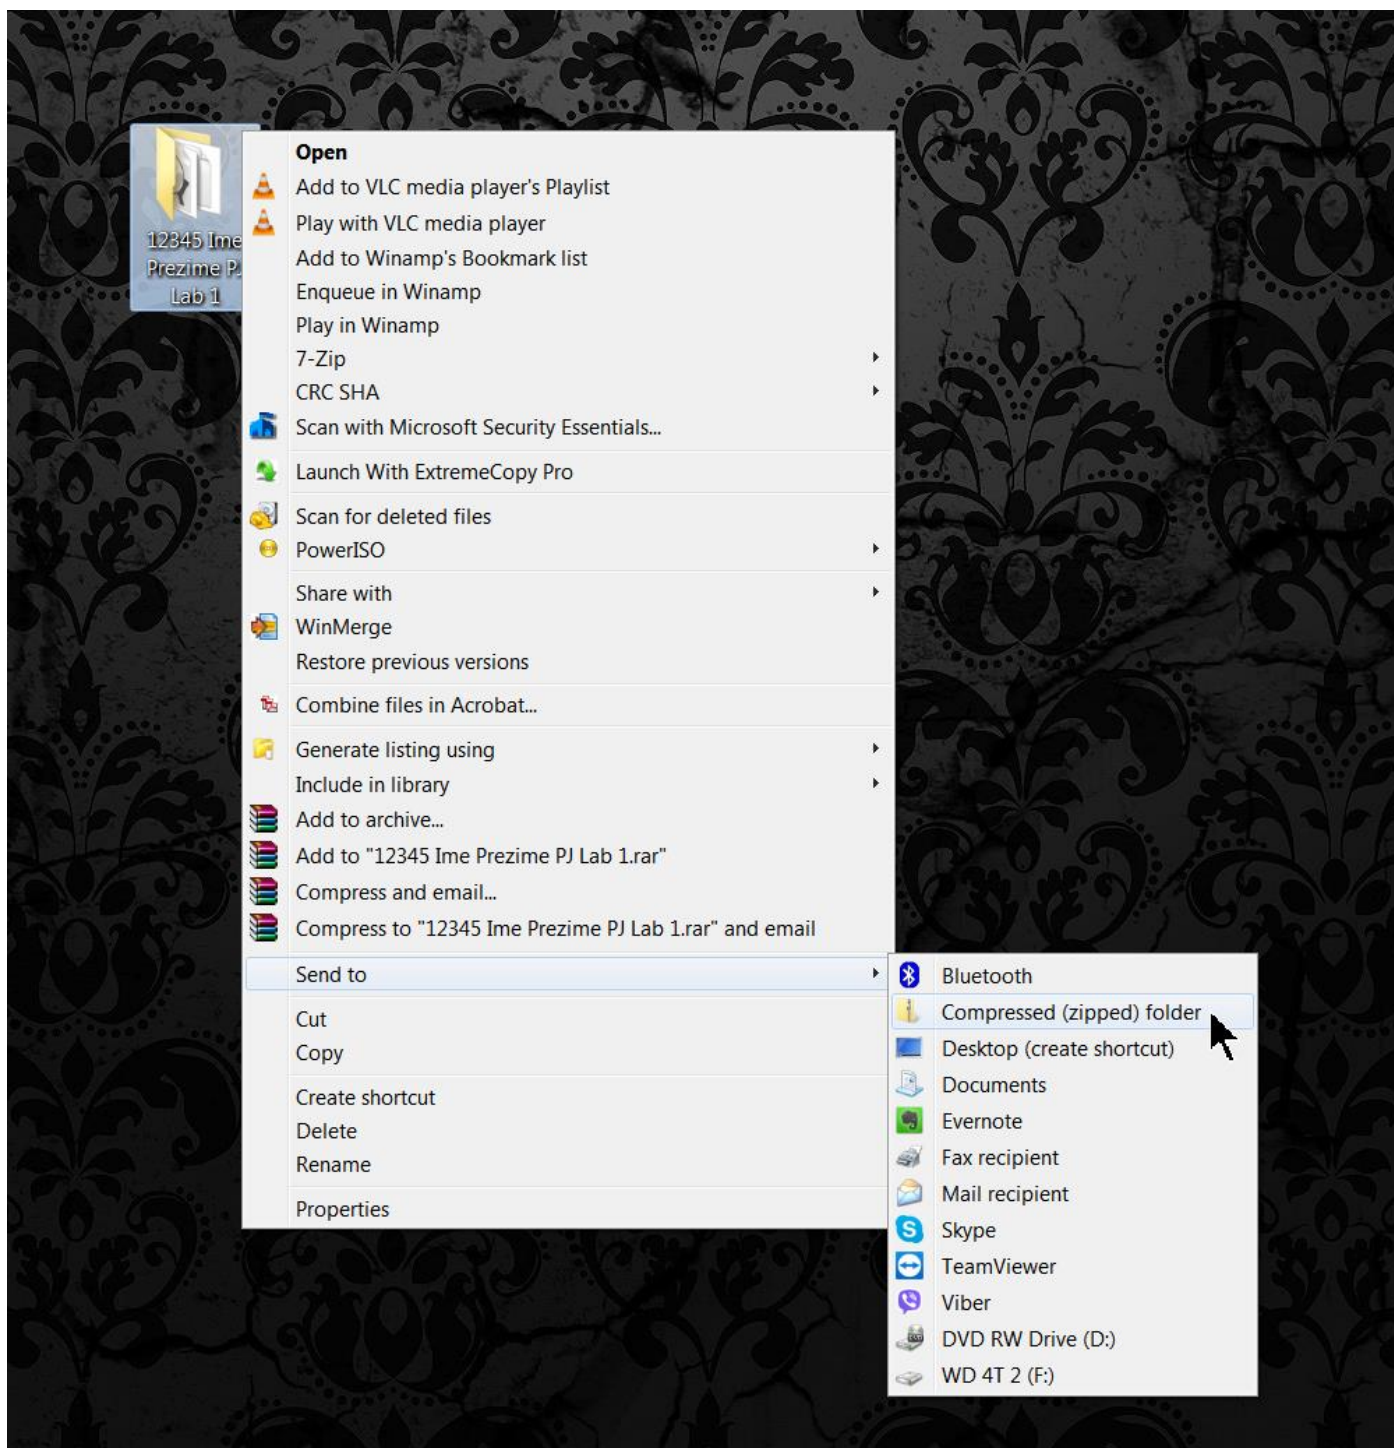

Finish:

Folder sa projektom će biti kreiran na izabranoj lokaciji:

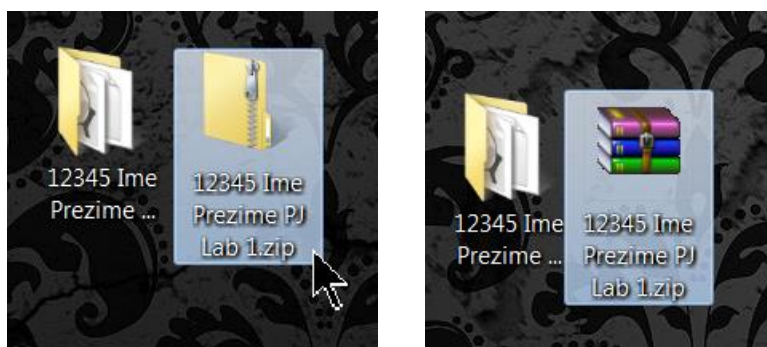

Desni klik na kreirani folder sa eksportovanim projektom:

Izabrati Send to -> Compressed (zipped) folder, ili kompresovati aplikacijom po izboru.

Format arhive treba da bude **zip**.

Arhiva će imati ikonu kao na slici levo, ukoliko je zipovana Windowsovim ugrađenim zip arhiverom. Ukoliko je format .zip dodeljen WinRaru, ikona će imati izgled kao na slici desno. Važno je da format arhive ne bude .rar, .7z, .gz ili bilo šta slično, već isključivo **.zip**.

Očekivano je da veličina arhive bude mala.
